Professional Summary

Software developer seeking to improve my development skills and professional expertise, to learn and grow in the new role as a developer at your organization. I'm outgoing and detail-oriented, proficient at building and maintaining professional relationships. Customer satisfaction driven. With detailed SDLC skills. Ability to think through a problem coupled with the confidence to make ideas heard. A proven ability to maintain and enhance software with the aim of improving operational functionality in line with business requirement. I am currently looking for an opportunity preferably in software engineering opportunity that will allow me to work alongside an expert team of engineers. Thereby helping to drive my career progression to more senior roles in the future. To be part of a company which support high quality software development projects, working with stakeholders, customers to develop technical and functional specifications.

Work Experience

2012

Transnet Freight Rail, Park town
Learner assistant from TechnoGirl Programme, part-time filing assistant.
